a field guide to eucalyptus trees for areas in australia from snow country to desert

prepared by the leading authorities on the eucalyptus species this new expanded edition will comprise the definite source for identification in south eastern australia first published in 1983 this new edition includes all new species recognised by the authors and many new colour plates

australia is remarkable in that its landscapes are often associated with a single group of plants the eucalypts the genus eucalyptus includes about 900 species and subspecies with almost a third occurring in south eastern australia in the crescent from the top of spencer gulf in south australia around to the northern new south wales border including tasmania all known species arid subspecies from this region are now included in this new third edition of the field guide to eucalypts volume 1 south eastern australia all are fully described and illustrated with over 1 500 colour photographs and drawings with each page treatment the more distinctive plant features are emphasised with bold type and colour photographs showing the form of the species i e tree or mallee and its bark flower buds and fruit the botanical terms used throughout are explained and illustrated in the introduction and defined in the glossary in the revised second edition of 2000 each plant digest was provided with a summary showing where the species fits within the overall classification of the genus and this method has been continued with the current volume the book begins with a history of the genus eucalyptus since first discovered by early european navigators and botanists this is followed by a section outlining the characters we use to identify eucalypts a separate key is provided for each of the four states and the australian capital territory as covered in this volume a

range of accessible characters is used to distinguish the species volume 1 covers most of temperate south eastern australia and provides the most authoritative reference for anyone interested in trees botanists foresters naturalists and indeed tree lovers everywhere

updated edition of this illustrated guide to identification australia s bush and cities alike are dominated by eucalypts in habitats as diverse as desert dunes and snowy mountain tops eucalyptus uses are varied from commercial harvesting for essential oil timber or fibre to species with spectacular flowers that are prized by gardeners as ornamental trees many of these species may superficially look alike it is not possible to identify eucalypts from their leaves alone but with a few simple aids to identification most can be tracked down this easy to use book guides the reader through the key features type of bark appearance of buds flowers and fruit the gumnuts and arrangement of bud clusters that will lead to the correct species name

the european garden flora is the definitive manual for the accurate identification of cultivated ornamental flowering plants designed to meet the highest scientific standards the vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed gardener as well as to the professional botanist this new edition has been thoroughly reorganised and revised bringing it into line with modern taxonomic knowledge although european in name the flora covers plants cultivated in most areas of the united states and canada as well as in non tropical parts of asia and australasia volume 4 contains accounts of 82 families mostly rather small but including the primulaceae with primula as its largest genus and ericaceae with rhododendron the largest genus in the flora
